France

To whom it may concern,

I, Herman Johannes Eligius de Brock, hereby claim the surface area of any abandoned "derelict satellites", placed in or above the so-called "graveyard orbit", now or any time in the future, as my territory, for as long as they will remain in space. These satellites shall be regarded as man-made, non-terrestrial, abandoned territory, with the intention to subdivide the surface area of these objects and to be sold as real estate in space. (Graveyard Orbit is regarded to be 22,400 miles or 36,050 km from earth)

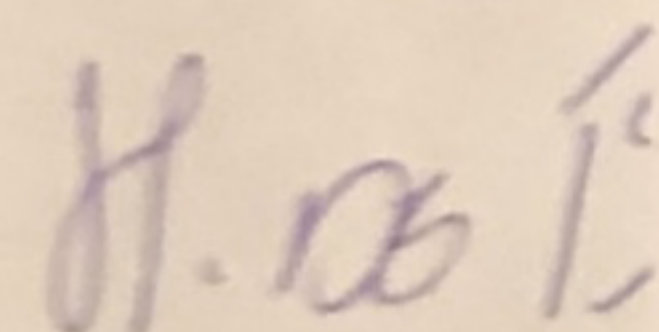

This claim is in principle not about the technology (value or utilization) nor about the intrinsic value of these manmade objects. The claim remains, at least for now, solely about the territory these objects occupy in space. I have no intentions to alter the state of any of these objects.

The "graveyard orbit" contains a lot of so-called "Space Junk". I understand and highly support the idea that this will have to be cleaned up some time in the future. This claim seeks to draw proper attention to this serious matter, I will happily assist and shall not interfere with any retrieval of objects in "graveyard orbit".

Should any of these objects in "graveyard orbit" ever, spontaneously, accidentally or controlled, re-enter earth's atmosphere, the launching nation, according to international space law, will bear all responsibilities. I accept no responsibility whatsoever for any physical or material damage caused by such an event or any other, including collisions.

If you have any legal objections to my endeavor, please contact me with argumentative and legal proof within a reasonable time period of two months after present date.

Sincerely,

Herman de Brock
